

Water Board Meeting Minutes
June 23, 2020

Attending: Bill Meunier, Don Nelson, Jeri Reichman, Jim Smith, Dick Waters

Call to order: 6PM

-Discussed cathodic device in water tank. The device keeps the tank from rusting. Three of the twelve arms are missing. The installation and maintenance company, Corpro, states that nine annodes are more than enough to perform the intended job. Readings are above 850 millivolts, an acceptable level. Corpro will be back to check the tank in the fall.

-Cory Hixson has been hired to help the water department as needed.

-Meters are being replaced.

-All water hydrants are in working order.

-DOT is being careful not to hit lines as they replace bridge on Wildman Avenue.

-Discussed insulation issue at water tower building. Board members will inspect all buildings.

-The board discussed adding a bathroom at the well house. Decision was made to address town board of issue. There has never been a bathroom at the facility.

Meeting adjourned at 6:40
